**Technidyne Announces new Agent for France**

**Technidyne Corporation** is pleased to announce that **TECHPAP** is our new representative in France. 'TECHPAP is a commercial company created by the "CENTRE TECHNIQUE DU PAPIER" (C.T.P.) to develop the sale of products performed by its partners.' **TECHPAP** replaces Equitech (Rycobel N.V.) as Technidyne's official provider of sales and service in France, effective immediately.

**Technidyne Corporation** is a world leader in providing quality control equipment to the Paper Industry. Founded in 1974, the company specializes in laboratory test equipment including the automated paper test system, PROFILE/Plus™, and color spectrophotometer, Color Touch™. Since its first international shipment to Spain in 1979, Technidyne has shipped products into 55 countries outside of the United States. A sister company, Technidyne Inc. in Canada and a network of independent sales and service agents and distributors in over 30 other countries assist Technidyne in providing equipment to the worldwide Paper Industry.

By creating stronger brand recognition and strengthening our alliance with other key suppliers of quality testing instrumentation, Technidyne will be better placed to serve the markets in Europe.

In order to enjoy the continued smooth operation of your **Technidyne** instrument we recommend that you receive your parts and service from **TECHPAP** your **only** authorized **Technidyne Service Representative** in France. Having the correct parts and service will ensure that your equipment continues to provide accurate test results, and your Warranty remains valid.
